

The press and partner kit consists of texts and graphics for use in articles, partner pages and promotional materials.

Company and product logos are provided in PNG format at a range of resolutions, as well as SVG and EPS.

If you need a logo at a resolution not included among the PNG files, you can generate your own from the EPS file.

Two versions of the ALM Works company logo are included in the kit: with white lettering on a purple checkered background (like in the header on this page) and with purple lettering on a transparent background.

Feel free to use whichever version looks best in your publication.

Please do not modify, crop or distort any of our logos in any way.

Creating a grayscale version for use on your website is fine.

Transparent logos should always be displayed on a plain white background.

If you have any questions about using materials from our press kit, please contact marketing@almworks.com

About Us

Short	ALM Works is the creator of Structure, one of the most popular JIRA add-ons on the Atlassian Marketplace. It allows individuals and teams to organize cross-project collections of issues into hierarchies of any depth, with aggregated values for progress, time and other JIRA fields. It can automatically adjust hierarchies to match existing JIRA relations such as Issue and Epic Links.
Medium	ALM Works specializes in developing project management tools. We are best known for Structure, a JIRA add-on that allows individuals and teams to organize cross-project collections of issues into hierarchies of any depth, with aggregated values for progress, time and other JIRA fields. It can automatically adjust hierarchies to match existing JIRA relations such as Issue and Epic Links. Our mission is to create software that is easy and intuitive to use, that adds value to existing business processes and increases productivity wherever possible.
Long	ALM Works is a privately held software development company that focuses on building project management tools. Founded in 2004 in Saint Petersburg, Russia, ALM Works released its first commercial product Deskzilla (desktop client for Bugzilla) in 2005, which was followed by JIRA Client in 2007. After participating in the very first AtlasCamp developer conference in 2008 and in the first Atlassian Summit in 2009, ALM Works focused its attention on Atlassian products and became a prominent member of the Atlassian ecosystem. Thanks to the high quality of its products and great customer support, ALM Works has become one of the first Atlassian Verified vendors and continues to improve both its products and processes striving to deliver the best to its customers.
